African Violets -- Unusual House Plants  
Spring 1958 List.

All plants are inspected and shipped in pots. Small plants are 2 1/2 inches tall. These ship best and keep on growing. Give other varieties in which you are interested. If plants are smaller than usual I include an extra plant or a larger size. Cut leaf orders are packed in plastic envelopes and sent by first class mail. Leaves rooted in Magic Mix, rolled and packed in Air Wrap. In all plant orders of \$10.00 or over (no supplies) I will include extra plants or cuttings or both.

Many other Varieties are available in too small quantities to list. Ask about any others you are interested in. Any questions on varieties will be answered if stamp is enclosed. Substitutions will be made unless instructions are to the contrary.

I have a tremendous supply of large cuttings, and especially welcome both dealers and collectors to my home. A discount of 10% will be allowed on \$10.00 orders at my home. Please make an appointment when coming from a distance. I live 5 miles West of Freeport (Rte. 20) to Club Esquire, turn North, one-fourth mile.

Your order automatically puts your name on the mailing list for the following year. Every order must be accompanied by a mailing fee of \$1.00 for insured parcel post or \$1.25 for Special Handling. State which you prefer. All leaf orders must include the \$1.00 mailing fee. No orders sent without the mailing fee.

NOTICE -- Illinois residents add 3% sales tax (3¢ for each \$1.00 of order) out of state customers are not required to send Sales Tax.

Sodium Selenate--10 capsules for \$1.50 postpaid with detailed instructions for use, enough for about 175 to 200 plants.

MAGIC MIX--a prepared mix for starting gloxinia, begonia, episcia, violet or any plant cutting, a fine medium for starting seed. It contains no soil or chemical fertilizers. It can be used alone or combined with equal parts of violet soil for growing and blooming large specimen plants. If you prefer to root cuttings in water they can be transferred to this mix without shock.

Magic Mix should always be moist, not wet when used. Press firmly into container, plant cuttings, water thoroughly firming mix around cuttings. When dividing cuttings always water thoroughly, cutting can then be easily divided without injury to roots.

Atlas Fish Emulsion is recommended as fertilizer.
